

Release Notes

INSTED Ver. 8.3.1

TTC TECHNOLOGIES, INC.

March 21, 2017

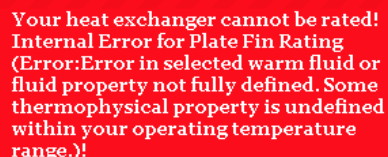

Release Features

INSTED Ver. 8.3.1

The latest version of INSTED (Ver. 8.3.1) includes the following bug fixes and enhancements to INSTED 8.3.

Bug Fixing for Plate-Fin Solver

- For Plate-Fin module in INSTED 8.3, when one stream using REFPROP fluid and the other stream using user-defined custom fluids, the custom fluids data cannot be correctly interpolated by INSTED solver and the following error message will be shown:

Your heat exchanger cannot be rated!
Internal Error for Plate Fin Rating
(Error:Error in selected warm fluid or
fluid property not fully defined. Some
thermophysical property is undefined
within your operating temperature
range.)!

This bug has been fixed in INSTED 8.3.1.

Bug Fixing for INSTED UI

- In INSTED 8.3, when exporting a plate-fin rating/sizing/optimization project with user-defined fin data into a XML project file, the user-defined fin data will be missing in the exported project file. This bug has been fixed in INSTED 8.3.1.
- In INSTED 8.3, user-defined custom J/F data can be deleted in the “Project Management” even when the J/F data is being used for an existing plate-fin rating project as a part of user-defined fin data. Accidentally delete this J/F data will make the rating project failed to compute. In INSTED 8.3.1, this bug has been fixed in INSTED 8.3.1.
- In INSTED 8.3, when deleting multiple projects in “Project Management”, the last checked project will not be deleted. This bug has been fixed in INSTED 8.3.1.

Enhancement for INSTED UI

- For Plate-Fin multiple rating, sizing, and optimization modules In INSTED 8.3.1, user can directly input/change user-defined fin data for the reference rating project by clicking “View Details” button, as shown in the following picture:

II. Choose a Rating Project:

UDF Test ?

Inlet K-Factor:	0.4
Outlet K-Factor:	0.4
Use RefProp Fluid:	None
Use Custom Fluid Properties:	None
Fluid Density [kg/m ³]:	0.540000
Fluid Specific Heat [J/(kg·K)]:	1059.999
Fluid Viscosity: [kg/(m·s)]:	0.000032
Fluid Conductivity: [W/(m·K)]:	0.05
Use User-Defined Fin (UDF) Data:	Yes
Plate Spacing (UDF) [m]:	0.0057
Equivalent Diameter (UDF) [m]:	0.002775
Free Flow Area / Passage (UDF) [m ²]:	0.009207
Fin Area / Plate Area (UDF):	5.55
Base Area / Plate Area (UDF):	1.85
Fin Efficiency (UDF) [%]:	77.5
Fin Weight / Plate Area (UDF) [kg/m ²]:	1.53
Customized J/F (UDF):	UDF H
